THERE’S A MOEN BEHIND EVERY EXTRAORDINARY SHOWER.
You get terrific water flow the moment you turn on Posi-Temp. To adjust temperature, turn the handle counterclockwise until the water feels comfortable.

MAINTAINS WATER TEMPERATURE
Go ahead and run the dishwasher! You’ll never experience an irritating hot or cold surge in water temperature - or the shock associated with it. Even running a dishwasher - or flushing a toilet - won’t disrupt the comfort of your shower.

STYLE VERSATILITY
Want flexibility with your decor? Only Moen offers a variety of styles and finishes. Plus, Moen’s exclusive M・PACT® system allows you to change or upgrade your style in minutes - without changing the plumbing.

MAXIMUM TEMPERATURE SETTING
Get peace-of-mind for your family. You can predetermine the hottest temperature setting before installation, so even the most curious child won’t get burned.

Posi-Temp creates a great, worry-free shower.

Pressure-Balancing Cycling Valve

- Maintains water temperature
- Style versatility
- Maximum temperature setting
- Meets pressure-balancing safety codes
- Lifetime warranty
- Easy-to-replace cartridge
Pull out a refreshing experience.

Water volume is at your control - just choose the flow by pulling out the Moentrol handle a little or all the way. It stays at the same temperature setting last used.

Moentrol offers the same great features as Posi-Temp, plus:

**VOLUME CONTROL**
Want more control over water flow? Moentrol allows you to adjust the amount of water that flows through your tub or shower - from a gentle stream to full-force. Plus, it's engineered to provide a higher overall water flow than Posi-Temp.

**TEMPERATURE MEMORY**
Looking for something that's simple to operate? Just push in the handle to shut off the water flow, then pull the handle out to turn the water on. Moentrol stays in the same temperature setting you last used and returns to that temperature within a few seconds.

**VERTICAL SPA COMPATIBLE**
Dreaming of more than a traditional shower? Add an additional showerhead, hand shower - or design a complete vertical spa experience.

You can choose either a basic Moentrol (left) or Moentrol with built-in three-function transfer valve (right).

Moentrol with built-in three-function transfer valve allows you to switch the water stream from a showerhead (1st function) to a hand shower or body sprays (2nd function) - or two sources at once (3rd function).
Pressure-Balancing Volume Control Valve

- Volume control
- Temperature memory
- Vertical spa compatible
- Maintains water temperature
- Style versatility
- Maximum temperature setting
- Meets pressure-balancing safety codes
- Lifetime warranty
- Easy-to-replace cartridge

Additional trim styles:
Nothing is more precise than ExactTemp. You can accurately dial up water temperature using ExactTemp's thermostatic control.

ExactTemp offers the same great features as Moentrol, plus:

TEMPERATURE CONSISTENCY
Hate readjusting the water temperature during a long shower? ExactTemp's precision temperature control means that the water temperature doesn't fluctuate - even as the hot water in your tank gets lower.

PRECISION THERMOSTATIC CONTROL
Do you want precise control over water temperature? ExactTemp lets you dial up the same water temperature day after day - like a thermostat. This thermostatic technology is the most advanced temperature control available from Moen.

PINPOINT TEMPERATURE SAFETY
Do you have small children? Only ExactTemp's precision temperature control is also pressure-balanced to assure your family's comfort and safety. Unlike many thermostatic valves, ExactTemp immediately responds to changes in water pressure. It prevents the scalding-hot or ice-cold water that can occur when others in your household are using water - for example, running the dishwasher.

MAXIMUM FLOW VERTICAL SPA EXPERIENCE
Want to pamper yourself with the ultimate vertical spa? Force... flow... coverage... ExactTemp makes your vertical spa experience a luxurious one.
VERTICAL SPA

Escape into your luxurious retreat.

Personalized pleasure
Surround yourself in water. Choose from any imaginable combination of showerhead, hand shower and body sprays to create a personal spa that feels remarkable.

Simple luxury
Why wait for a whirlpool tub to fill? Every day you can turn your traditional shower into a spa-like experience... from the moment you turn it on.
